I am a Full-Stack React Developer skilled in building Minimum Viable Products (MVP) quickly without compromising quality, scalability, or maintainability. I have experience in web and mobile app development, and I am proficient in using modern tools to turn designs into functional, reliable applications. I am skilled with utilizing modern APIs as well as managing databases through Back-end As A Service (BaaS) applications.

PROJECT EXPERIENCE

P2Trust

Lead Developer and Project Leader

August 2024 - October 2024

FinTech mobile application

- Developed using Expo and React Native, with a codebase entirely in TypeScript.
- Integrated Supabase as a Backend-as-a-Service (BaaS) solution for data storage and user management.
- Implemented real-time messaging with End-to-End Encryption (E2EE) for secure communications.
- Designed a simplified Know Your Customer (KYC) process using National ID E-Verify.

SmartTicket

Lead Developer and Project Leader

March 2024

Ticketing Web Application

- Built with Vite and React JS, utilizing JavaScript for front-end development.
- Leveraged the HuggingFace API to integrate machine learning capabilities.
- Utilized Firebase as a Backend-as-a-Service (BaaS) solution for data management and authentication services.
- Developed a custom REST API using Express JS to handle backend logic.

EDUCATION

CIIT College of Arts and Technology

Bachelor's Degree in Computer Science

Quezon City

2021 - 2024

RELEVANT SKILLS

- Expert in using TypeScript and JavaScript for building robust, scalable applications across web and mobile platforms.
- Extensive experience in developing interactive user interfaces and mobile applications using ReactJS and React Native frameworks.
- Proficient in utilizing Firebase and Supabase to manage database operations, authentication, and real-time data synchronization.
- Skilled in using Figma to translate design ideas into functional, intuitive interfaces.
- Experienced in building and consuming RESTful APIs, using Express JS for server-side logic and handling HTTP requests.
- Savvy in communications platforms and applications like Slack.
